PROPS:

1. One of the hooks on the architecture that holds up the SL arch sail (#D1004) came off. We put the hook that came off in the prop cabinet, on the *Mariners* shelf. Could we get it replaced?

FACILITIES/CUSTODIAL:

1. The large dead detached branch in the SR tree is still there, and is slowly making its way toward the bottom of the live branches, getting closer to falling off onto either the stage or the audience. Could we get it removed?
 2. The SL/south tree now has a few dead branches throughout. Could it be checked and could we have the detached branches removed?
-

PERSONNEL/ACCIDENTS:

PERFORMANCE:

1. During *Haul Away Joe*, the misters had an issue and suddenly began dousing the cast with a curtain of water. We held for a couple minutes so that Thompson and Searle could wipe the deck off, and we turned the misters off for the rest of the performance. We resumed the show shortly, skipping the rest of *Haul Away Joe* and beginning with *Siren Says*. Barnaby, Fronk, and Newbury ad libbed a few jokes about the “leaky boat.”

2. Since there was no show in the Englestad tonight, we had Barnaby, Christiansen, and Fronk run through the green onto the hill, instead of having them run up to the Englestad at the end of the show.
